Sustainability

We are firmly committed to sustainably developing our activity, and consequently, we have implemented various actions and measures to reduce our carbon footprint. We have efficient energy consumption programs, including solar panels, recirculating pumps, low consumption equipment, and openings with RPT. We also implemented a system for separating and recycling our waste and food waste composting program.

We prioritize the generation of local employment, training, and encouraging our team to acquire new knowledge and grow professionally.

Mostly, we choose small local entrepreneurs from the region as our suppliers and external service providers, to offer higher quality products under sustainable and organic practices, and to collaborate with the regional economy and the development and growth of the local entrepreneurship ecosystem.

Rooms & Suites

Our 80 rooms and suites have been carefully curated with a seductive combination of colors, textures, and bespoke furnishing. All rooms feature balconies and floor-to-ceiling windows offering great natural light and expansive city views.
